

# Diavolus Mini

The intelligent smoking device

***evalink***

The Diavolus Mini offers immediate protection against burglary and property damage. The smoker produces a dense, harmless smoke and ensures that nothing can be seen.

In the event of an alarm, the Diavolus Mini is activated by a Motion detector activated. An alarm signal and an optical indicator are triggered simultaneously with the smoke.

In the event of a burglary, the damage remains minimal. The smoke leaves no residue or damage and dissolves after a certain time. You don't lose any time cleaning up or plastering.

The integrated alarm transmission makes it possible to report the states to the alarm receiving centre at any time. The fogging only starts if the high-precision integrated motion detector is triggered. The intervention service is and takes care of all important matters, if you wish.

## Advantages

- First alarm system independent smoking device
- Immediate intervention
- Damage at burglary remains minimal
- Simple operation of the smoking device
- Regular maintenance and repair of the object by specialists
- Save on your insurance premiums
- Motion detection via wireless PIR sensor
